JOYAGES: VIRTUAL ESCAPES

"Selecting the Conjunction During Crisis"

Today's video has Joyages co-founder, Brett Newman sharing the simple importance of selecting the proper conjunction for a positive mindset during this pandemic. Saying 'or' versus 'and' can determine your future outlook. 'Or' eliminates the middle ground, no gray, just good or bad, absolute, whereas 'And' allows you to connect the dots, allows you to acknowledge the bad, but look to the good at the same time. It's okay to worry about this situation, but look for the...'and' we will get through this together.

So, we put together one of our videos to set the record straight. Take a peek and share with your workforce to explain those who have a Dependent Care FSAs and how they can modify their contribution, if necessary.
